Practice questions

Javascript basics

Find the output of the following JavaScript code.

1. a = 5;
   function first() { a = 6;}
   function second() {alert(a);}
   second(first());

2. var x = [typeof x, typeof y];
   console.log(typeof typeof x);

3. var a = 6;
   function test() {
   var a = 7;
   function again() {
   var a = 8;
   alert(a);
   }
   again();
   alert(a);
   }
   test()
   alert(a)

4.
```
function getFunc(a) {
return function(b) {
console.log(a+b); }}
var f = getFunc(7=='7');
f(5);
```

5.
```
var x = "8"
for(let i = 10;i>5+2;i--)
{
console.log(i)
if(i>=x)
continue;
}
```
